## 1 Text Flows

Text flows are marked by <tf> and </tf>. The text flow in italics has the number 1, i.e. <tf 1>, and the other text flow has the number 2, i.e. <tf 2>.

Type the <tf> and </tf> tags on separate lines. On each page, type the first text flow before the second text flow.

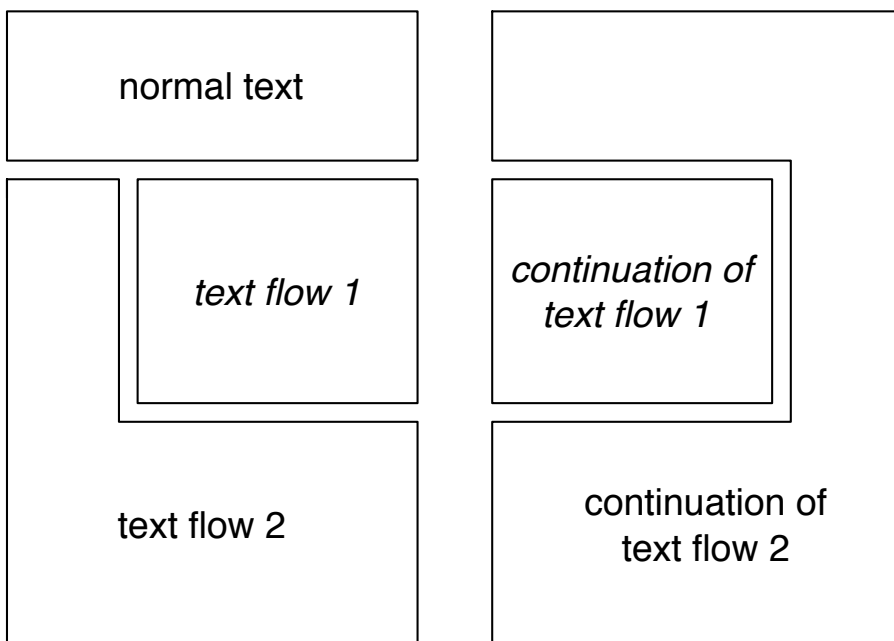

### EXAMPLE I: TWO REAL PAGES

(not transcribed)

PLEASE NOTE: Both text flows have separate catchwords, which should not be typed. Each text flow may have its own marginal notes; type them according to the rules in section 2.4.1 in the main Data Entry Specs.

## EXAMPLE 2: HOW TO TYPE TEXT FLOWS

```
<pb>
normal text
<tf 1 it>
text flow 1
</tf>
<tf 2>
text flow 2
</tf>

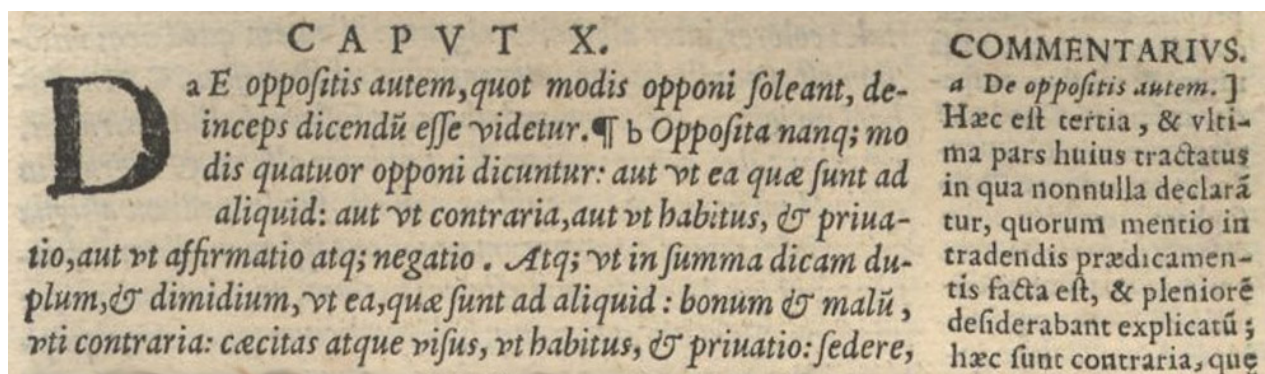

<pb>
<tf 1 it>
continuation of
text flow 1
</tf>
<tf 2>
continuation of
text flow 2
</tf>
```

## 2 Anchored Comments

Anchored comments are marked by `<ac>` `</ac>`. The anchor is treated like a footnote symbol, i.e. it is marked by `<n>` in the first text flow and it is typed inside the `<ac>` tag in the second text flow. In the second text flow, type the text after the anchor up to the `]` between `<ac>` and `</ac>`.

The anchor symbol in the first text flow may have an additional ¶, e.g. ¶ a in the first text flow and a in the second text flow. The anchors in the two text flows may not be on the same page.
