1.3 Other Structures With Large Spaces

If a normal paragraph contains at least one large space, mark it by #, i.e. use <p #>.
Mark each large space in the paragraph by #.

Before you use <p #>, make sure the paragraph is not part of a table, an index or a table of contents.

Example 2

```

2 Special Instructions for Individual Texts

2.1 Alberti (1565)

Line numbers (5, 10, 15 and so on) are typed just like normal marginal notes, but are marked by `<ln> </ln>`.

The position of the line numbers to the left or right is not marked.

2.2 Aristoteles (1548)

Type the table with six columns on p.0205 as two separate tables, each with three columns.

2.3 Bion (1723)

In the table on p.0209, do not type the vertically printed words. Type the last column (`La Regle ... $en$ible.`) as a normal paragraph outside the table.

2.4 Gravesande (1721/5)

In the index starting on p.0805, type the horizontal lines as `#`.
